

INFRARED DECODER; MICROCOMPUTER COMPATIBLE

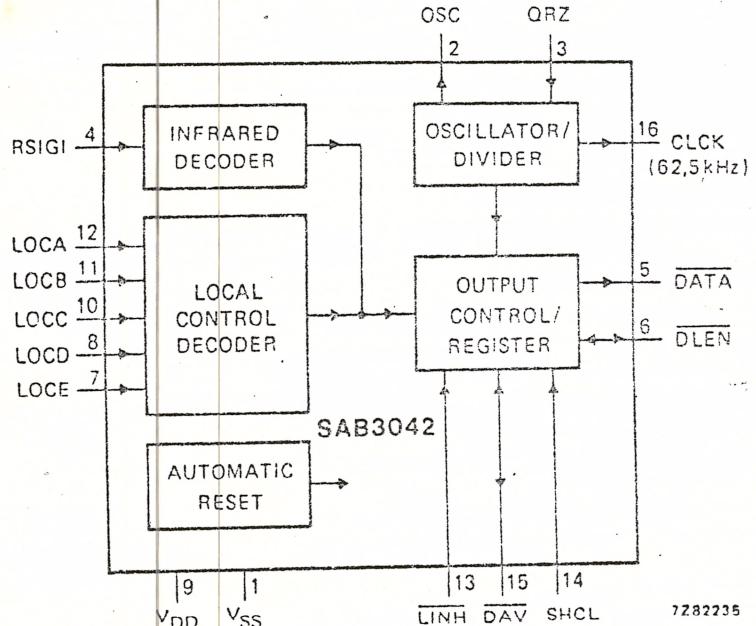

Fig. 1 Block diagram.

Features

- Remote control receiver for 128 commands to be used in combination with the remote transmitter SAB3011 in microcomputer controlled tuning concepts.
- High security against interferences by word format checking and double word testing, also in case of a simultaneous infrared sound transmission.
- Asynchronous serial command output to the microcomputer with processing of acknowledgement signals produced by the microcomputer.
- Relieving the microcomputer of real time processing, e.g. incoming signals are permanently checked with the command format validity and freedom from interferences.
- Separate inputs for local operation (up to 31 commands); mask-programmable.
- Only three terminals of the microcomputer are necessary for the control part of the television receiver.
- Internal clock oscillator.

QUICK REFERENCE DATA

Supply voltage	V _{DD}	typ.	5 V
Operating ambient temperature range	T _{amb}	0 to +70 °C	
Oscillator frequency	f _{QRZ}	typ.	4 MHz
Supply current; V _{DD} = 5 V; T _{amb} = 25 °C	I _{DD}	typ.	20 mA

PACKAGE OUTLINE

16-lead DIL; plastic (SOT-38Z).
